REGEN™

Bioactivity, where it counts

Regennex Universal Bond incorporates bioactive materials directly into the adhesive layer for maximum ionic release

Unlike conventional restorative materials, which may not provide the ionic release required for productive outcomes, ReGen Universal Bond employs Bioglass as its active ingredient. Bioglass has been proven through decades of medical research and clinical studies to stimulate hydroxyapatite formation.¹

Bioglass provides additional benefits, including the closure of gaps at the resin-dentin interface, antimicrobial cleansing,² and the potential for improved bond longevity.

Add Bioactivity to any of your trusted composites.

Deposits bioactive ions where it counts, directly at the resin-dentin interface

Stimulates regeneration of hydroxyapatite

Alkaline pH aids in the prevention of secondary caries

BPA-Free
Patient friendly,
non-toxic
compatibility

*Offer valid through 6/30/2020
For no charge goods, email a copy of your invoice to orders@vista-dental.com or fax (262)636-9760.
Allow up to 8 weeks for redemption. Invoices must be submitted by 7/31/20
Patent Pending

REGEN™

Top 4 Elements of a Superior Universal Bond

Bioactivity At The Adhesive Layer

Biologically charged ions are deposited directly onto the enamel for maximum ionic release

Stimulates Self-Repair

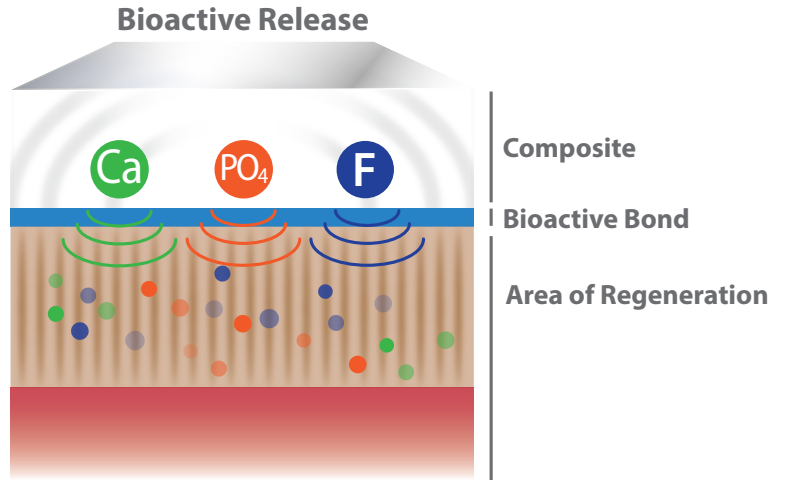

Employs Bioglass as an active ingredient, which is proven to stimulate bone cells toward self-repair³

Enhances Marginal Integrity

Releases ions needed to stimulate hydroxyapatite formation and close gaps at the resin-dentin interface

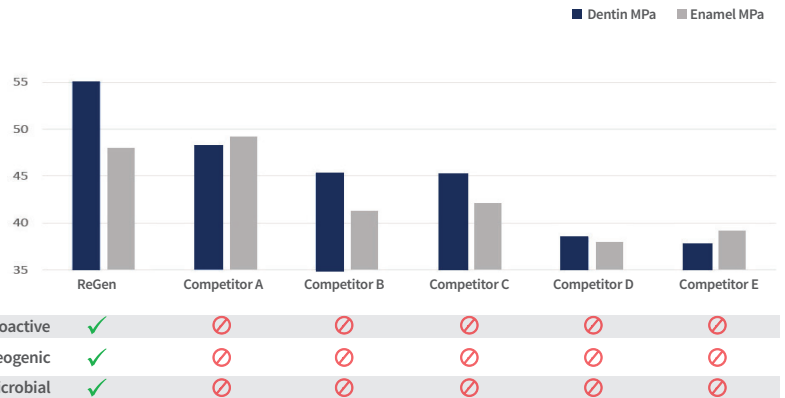

Improves Bond Longevity

Delivers an incredibly high shear bond strength and potentially improves bond longevity

Note: Participating in a promotional discount program (e.g., points, discount redemptions or other special awards) is only permissible in accordance with discount program rules. By participation in such program, you agree that, to your knowledge, your practice complies with the program requirements. For HS promotions: This promotion offers a bundled discount. The cost of any "buyget" (or "no charge") items is a discount applied to your other purchases on the same invoice. The reportable value (unit price) of the "no charge" item will be identified on the invoice. To calculate the applicable discount on the other items on the same invoice, divide the total value (unit price(s) of any no-charge item(s) by the total value (extension price(s) of all other items purchased on the same invoice, and apply the resulting percentage equally to each item to determine net prices. For manufacturer promotions: The prices stated in the invoice or statement may reflect a discount or be subject to a rebate. You must fully and accurately report this stated discount price, or if applicable, any net pricing, after giving effect to any rebates, to Medicare, Medicaid, Tricare and any other federal or state program upon request by any such program. Accordingly, you should retain these records. It is your responsibility to review any agreements or other documents applicable to these prices to determine if they are subject to a rebate.
