Vista-Blue™ Fracture Detection Kit

REF 503429

INSTRUCTIONS FOR USE – Description:

Vista-Blue™ is a water soluble solution which is used for the identification of cracks, calcified canals, root canal orifices and carious dentin.

Method:

1. Remove Vista-Blue™ bottle, mixing well, and Micro-Applicator brushes from packaging.
2. Remove bottle cap and dispense desired amount of Vista-Blue™ into mixing well.
3. Saturate Micro-Applicator brush tip with Vista-Blue™.
4. Apply Vista-Blue™ to tooth.
5. Wait 5-10 seconds and rinse with water.
6. Identify the fracture.
7. Reapply as needed.
6. Dispose of Micro-Applicator brush after each patient.

Storage:

1. Store at room temperature.
2. Avoid contact with skin, eyes and clothing.
3. In the event of eye contact, flush with copious amounts of water and seek immediate medical attention.
4. If contact with clothing occurs, stain may be removed with mild detergent and warm water.
