# Introduction to **Bioactive Restorative Materials** and **New Advances in Zirconia** and its **Delivery**

With Course Speaker: **Dr. John Kanca III**  
November 4<sup>th</sup>, 2022 **8AM-12PM PST**

Join us for a special course by Dr. John Kanca, III, who is responsible for us etching dentin and bonding to wet dentin today. The lecture will focus on the concepts (and misconceptions) of bioactivity, how bioactivity works and the possibilities it offers to restorative dentistry.

The lecture will go on to teach you what you need to know to enjoy zirconia restorations that stand the test of time. Ever wonder why zirconia restorations come out? It is more common than you think, but there is an easy fix. This presentation will discuss how you can use the most widely used indirect restorative material, zirconia, for your usual and most conservative tooth preparations more predictably now with the new developments in Zirconia cleansers and primers.

A selection of restorative cases will be utilized throughout the lecture to provide helpful insights to aid in your restorative protocols. Insights including the cause and treatment of sensitivity, why white lines matter and how they can be eliminated, reducing overall stress within the restored tooth, and many other valuable tips.

Seats are Limited!
