

Everything but the Kitchen Sink

DesensiMAX Does Everything A Desensitizer Does And More

- + Provides fluoride at the restorative-tooth interface
- + Eliminates sensitivity INSTANTLY
- + Inhibits MMPs, giving you better bond longevity
- + Rewets the tooth surface to provide optimal moisture levels for bonding

VISTA APEX

No More Unhappy Calls From Patients

Vista Apex formulated a fast acting desensitizer perfect for instantly desensitizing exposed dentin, crown preps and all selective etch & total etch bonding protocols.

Most desensitizers on the market have the same active ingredient. **DesensiMAX** has all that and more. It rewets, provides fluoride, has an MMP inhibitor, provides an optimal surface for bonding or a contaminant free surface.

Clinicians can now do more with less!

MAXimum Benefits

Glutaraldehyde + HEMA
Immediately desensitizes

Sodium Fluoride
Creates zone of inhibition to prevent secondary decay

Optimal Moisture
Provides a sterile surface

MMP inhibitor
Provides better bond longevity

“I’m always on the lookout for products or techniques that can help improve clinical outcomes. What I discovered is that DesensiMAX belongs under every restoration that you place. It is such an easy product to incorporate into bonding protocols to enhance your restorative outcomes.”

- Dr. Troy A. Schmedding, DDS

DesensiMAX Fast Acting Desensitizer 10mL kit can be used with total etch and selective etch adhesive systems. Additionally, **DesensiMAX** treats sensitivity resulting from exposed dentin.

Kit Options

90413

DesensiMAX Fast Acting Desensitizer

- 1 x 10mL bottle
- 1 x single-cavity well
- 25 x applicators
