

NEW TO
THE STAGE...

RE-GEN™ BIOACTIVE ENDOSEALER

RE-GEN™ Bioactive Endo Sealer is a hydraulic, ready-to-use injectable bioactive paste that utilizes moisture naturally present in dentinal tubules to initiate a setting reaction. Endodontic sealers are used in the obturation of root canal systems to achieve a fluid-tight seal throughout the canal including the apical foramen, canal irregularities, and minor discrepancies between the dentinal wall of the root canal and the core filling material.

Our New Rock Star Endo Sealer

- Employs Bioglass to promote bio-regenerative healing while attracting and exchanging ions that promote remineralization of hydroxyapatite and reduces inflammation
- **Ready to use:** Injectable, single-component, bioactive paste with smooth flow handling
- **Biocompatible and Osteogenic:** Bioactive root repair material that is effective on non-vital cases
- **Anti-bacterial:** Creates a high alkaline environment to prevent bacteria formation
- **Dimensionally stable:** Low solubility with high wash out resistance
- **A faster set:** Fast and efficient set time of under 1 hour
- Highly Radiopaque
- Cost Effective + Paired with material savings MST tip

🧪 **Bioactive: Contains Bioglass**

🔗 **Superior Strength**

❄️ **Less Shrinkage**

🕒 **Quicker Set Time**

💰 **The Right Price**

Use with our MST Tips! Conventional application tips trap a significant amount of material inside, sometimes causing more material to be wasted in the tip than is used clinically.

What makes RE-GEN™ Bioactive Endo Sealer Better?

	RE-GEN™ Bioactive Endo Sealer	EndoSequence BC Sealer	Edge Bioceramic	AH Plus Bioceramic
Manufacturer	Vista Apex	Brassler	EdgeEndo	Dentsply Sirona
Radiopacity (mm Al)*	8.1	7.5	6.0	9.0
Root Canal Sealer Contents	2g Syringe with 20 MST Visco Tips	2g Syringe with 15 Tips	2g Syringe with 15 Tips	3g Syringe with 20 Tips
Set Time (min)*	60	> 120	660	> 120
Solubility (%)*	1.0%	2.9%	< 3%	1.4%
Kit Cost	\$85.00	\$160.00	\$128.88	\$150.00

What is Bioglass?

The RE-GEN™ product line employs Bioglass 45S5 as an active ingredient. Backed by over 50 years of medical use, Bioglass is supported by countless and has been proven to promote bio-regenerative healing, while attracting and exchanging ions with the oral environment.

Bioglass has been proven to promote bio-regenerative healing, while attracting and exchanging ions with the oral environment. Backed by over 50 years of medical use, Bioglass is supported by countless clinical studies. The sealer employs Bioglass to promote bio-regenerative healing while attracting and exchanging ions that promotes remineralization of hydroxyapatite and reduces inflammation.

We've had great success in using Bioactivity in our restorative products. We wanted to continue these same benefits to the root or apex of the tooth to help promote re-mineralization through an endodontic sealer.

Post-Op Radiographs

Looking at the premolar post-op versus 3 year recall, it's clear we don't see any wash out or change in the sealer over time.
