

RE-GEN™

BIOACTIVE BULK FILL COMPOSITE

Kit Options

90660

Full Kit

- 1 x 10 gram of RE-GEN™ Bulk Fill
- 8 x mixing tips
- 1 x extrusion handle

90658

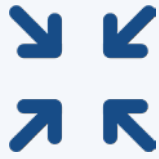

Refill Kit

- 1 x 10 gram of RE-GEN™ Bulk Fill
- 8 x mixing tips

Bioactivity

Contains Bioglass and other bioactive components that promote healing and prevent re-current decay in direct and indirect restorations.

No Shrinkage Stress

Unlimited, single layer placement eliminating shrinkage stress and ensuring a complete cure in all parts of the restoration.

Ease of Use

Easily polished, color stable, highly wear and stain resistant.

Single Material & Infinite Depth of Cure

Can be delivered to the occlusal service not requiring a final composite layer. Has infinite depth of cure.

RE-GEN™ Bioactive Bulk Fill Composite is a bulk fill, dual-cure methacrylate based material that allows you to fill all classes of restorations without worrying about shrinkage stresses, depth of cure, or voids.

The Bioactive Bulk Fill Composite is a more robust composite that can prevent coronal leakage which is the #1 reason for RCT failure.

“Bulk fill materials can be a tremendous time saver. The key to these materials is their ability to mitigate contraction stresses, crosslink to your adhesive and provide acceptable aesthetics. **RE-GEN™ Bulk Fill** is a fantastic choice that checks all these boxes.”

- Dr. John Kanca, III
