

Introducing a solvent with selective properties

Featuring a patent-pending blend of acids and surfactants, Endo Sealer Solvent™ selectively dissolves bioceramic sealers and calcium hydroxide while preserving dentin integrity—delivering a breakthrough in retreatment irrigation.

Endo Sealer Solvent™

The First Endodontic Irrigant Designed for Bioceramic Sealer Retreatment and Calcium Hydroxide Removal

Key Benefits:

- **Targeted Efficacy:** Engineered to selectively remove sealer and calcium hydroxide while being gentle on dentin
- **Versatile:** Suitable for all bioceramic sealers and calcium hydroxide
- **Time-Efficient:** Streamlines two visit endodontic procedures & retreatment procedures

Endo Sealer Solvent™

317033

• 1 x 8oz Bottle

* Shelf life 36 months from manufacturing date

"One of the most common questions and concerns I hear about bioceramic sealers is 'can you retreat these cases?'...now we have the answer to that questions-Yes, with Endo Sealer Solvent by Vista Apex Solutions."
